

# THE GOV^NOR & THE TRIGGER

## NEW! Sound System Limiter and Loudness Monitor Package from Fitness Audio

Introducing *The Gov^nor*®! Our Sound Pressure Limiter that puts the brakes on the loudness level and make it easier for Fitness Clubs, Function Centres, Shops, Pubs and Clubs comply with Occupational Health & Safety Laws regarding noise in the workplace - when that “noise” is pre-recorded music, with or without a fitness instructor or DJ shouting over the top of it.

Use it in the manual mode and set it up referencing a handheld SPL Meter for the noise level limit or link it up to it's companion product *The Trigger Loudness Monitor* and have a 24/7 control over how loud the sound system will play irrespective of whether the room is full of bodies or just with a few.

*The Gov^nor*'s front panel features an attractive Green to Yellow to Red Left & Right LED Bar display that gives a visual indication of how loud the system is playing to the operator and once set up and locked up there's nothing else to touch apart from the power on/off switch.

The 4 controls on the back are protected by a security panel that can be set and sealed with wire seals against tampering.

*The Trigger* repeats the twin bar display but will be mounted on a wall between speakers in either a vertical or horizontal position to show the Loudness Level in the room from 79dB to 109dB in 3dB steps using either “A” or “C” weighting.

Let *The Gov^nor*® and *The Trigger*™ keep a lid on the upper loudness level of your sound systems. They can be supplied and installed individually as stand alone products but will work best for you when linked together with a run of CAT 5 Cable.

Fitness Audio *SPL2.2 The Gov^nor Sound Pressure Limiter* and *The Trigger LM-30 Loudness Monitor* are distributed around Europe by Knud Danielsen A/S Denmark [www.fitnessaudio.dk](http://www.fitnessaudio.dk) - in the Americas by Fitness Audio, LLC Santa Cruz, Ca.
