

Fitnessaudio® SPL2 LIMITER

NEW! Sound System Limiter from Fitness Audio

Introducing The Gov^nor! Our Sound Pressure Limiter that puts the brakes on the loudness level and make it easier for Fitness Clubs, Function Centres, Shops, Pubs and Clubs comply with Occupational Health & Safety Laws regarding noise in the workplace - when that "noise" is pre-recorded music with our without a fitness instructor or DJ talking over the top of it.

Use it in the manual mode and set it up referencing a handheld SPL Meter for the noise level limit or link it up to a SoundEar® Monitoring Panel and have a 24/7 control over how loud the sound system will play irrespective of whether the room is full of bodies or just with a few.

The front panel features an attractive Green to Yellow to Red Left & Right LED Bar display that gives an indication of how loud the system is playing to the operator and there's nothing else to touch but the power on/off switch.

The 4 controls on the back are protected by a security panel that can be set and sealed with wire seals against tampering. When used with the SoundEar® it is basically tamperproof - turn it or the SoundEar off or unplug either and you lose signal to the poweramp, turn the SoundEar switch off and you lose signal to the amp.

Let SoundEar® and The Gov^nor keep control of the upper loudness level of your sound systems.

SoundEar® + THE GOV^NOR® = CONTROL!
